Some new publications about multithreshold algorithms.

2. V.V.Zolotarev. The Multithreshold Decoders can be Fast and Effective Ones. - Transactions STSREC of A.S.Popov, Issue VI-1, 6-th International conference and exhibition "Digital Signal Processing and Applications", Reports - 1, pp. 96-98.
11. V.V. Zolotarev. The non-binary multithreshold decoders are more effective than Read-Solomon codes. - In book: "International technological conference "Problems of data transmission and processing in networks and telecommunication systems". The theses of the reports", Ryazan, 2004, pp. 11-14.

15. V.V. Zolotarev. Improvement of the MTD characteristics in Gaussian channels. - Transactions STSREC of A.S.Popov, LVIII Scientific session dedicated Day of radio. Transactions, volume 2, Moscow, 2003, pp. 82-84.
